

## Sweet Security, free for your site.

Create **revenue** without losing any more precious page space.

Vidloop secures your users with an innovative image-based login in place of passwords. Some of the images in the login are sponsored by consumer goods, creating a stream of ad revenue without taking additional space away from content and users.

You can also allow users to opt in to ad content that interests them based on personal preferences.

## Stop the Bots.

Tired of evil bad guys phishing, keylogging, and brute forcing your users? Vidloop can help.

While corporations pay millions to defend against these same threats using hardware and cumbersome procedures, Vidloop provides similar security with an **enhanced user experience...**with none of the expected costs.

In fact, every time a user logs in, **you get paid.**

Stop wasting time, money, and energy on login safety and **get back to your site.** Unload login security onto Vidloop.

## Three ways to get paid:

- ✔ Deploy the Vidloop Secure® login on your site as a secure login for your site's existing content and functions.
- ✔ OpenID enable your site and become a myVidloop Affiliate.
- ✔ Deploy myVidloop for Domains, providing your users with added function of OpenID and a secure Password Manager built in.
